Jubilee-series

We will make a limited edition of Artist-, Dreadnought- and Jumbo-Jubilee guitars. All the models are made of solid rosewood with wooden bindings. The finish is high gloss.

J-5000

Landola's new jumbo guitar made of rosewood with high gloss finish.

Curly Birch-series

Landola has created an unique series made of curly birch. We have taken the most popular models and used curly birch on the backs and sides. The curly birch adds a pinch of crispness to an already great-sounding guitar.

Curly birch is a rarity in the world; its narrow range includes Finland. Due to its rarity and decorativeness, curly birch has been considered a valuable and interesting speciality and therefore, when in demand, it fetches a higher price than any other Finnish tree species.

A-85

Landola's new A-model is a continuation for the popular AC-series. A steelstring guitar with smaller sized body now without the cutaway.
