

LANDOLA EQ-500

side mount preamplifier for acoustic guitar

Landola EQ-500 is a budget choice for guitarist.

The EQ-500 preamp is simple and easy to use. It has a range of controls to create different sound colours. The EQ-500 has knobs for volume & contour and sliders for high, middle and low.

Battery compartment is under the preamp. You can easily replace the battery by pulling a small tab at the top of the EQ-500 preamp toward you. The body of the preamp will come out revealing the battery compartment.

Battery low LED indicates when it is time to change the battery.

Pricing includes all the necessary hardware.
